EDUCATION & ACHEIVEMENTS

JK Lakshmipat University , Jaipur , Rajasthan

B. Tech in Computer Science with a **CGPA** of **9.15**

Graduation : 2024-2028

Scholarships : Awarded **100% merit-based scholarship**

Honors List: Mentioned in the official Honors List of the university for academic excellence

TECHNICAL SKILLS

Languages: Java , C , Python , JavaScript , SQL

Libraries / Frameworks: Node.js , Next.js , React.js , GraphQL , WebSockets , Express

Databases: MongoDB , MySQL

Authentication: JWT , Google OAuth

Developer Tools: Visual Studio Code, Git, GitHub

PROJECTS

 github.com/ayushsharma2440

SABRANG 2025 (Annual University Cultural Fest) | sabrang.jklu.edu.in

Role : **Tech Coordinator** | **Developed Backend**

May 2025 – October 2025

- Developed REST APIs using **Node.js** with JWT-based authentication, Payment gateway integration with CashFree, Individual/Team registration and ticket generation with email delivery.
- Database schema design , Admin dashboard for check-in in a **Next.js** application.
- Managed Deployment of Backend service on Railway
- Generated **₹100,000+ in revenue** through website-based event registrations.

GPS & Face Verification Based Attendance System

Sept 2025 – December 2025

- Replaced physical attendance registers with an automated system using **GPS tracking and face recognition**, validating student's on-campus presence and improving security (false signatures) and efficiency (Location can be marked from anywhere on the campus , earlier students need to come to hostel).
- Developed a Node.js-based system with **SQL**, **Mappls API**, and **face-recognition.js** to verify student presence via GPS and facial recognition, with a dedicated admin panel for wardens.

Linkli | **Advanced URL shortener** | www.linkli.xyz

April 2025 – July 202

- Developed a full-stack URL shortener using **Node.js**, **Express.js**, **MongoDB** including features such as custom aliases, time-based expiry, one-time-use links, password-protected URLs, and QR codes
- Integrated secure authentication with **email/password login** and **Google OAuth 2.0** via **Passport.js**
- Designed detailed **analytics tracking** capturing device type, browser, operating system, IP address.
- Integrated **Google Search visibility** by enabling site indexing and implemented **custom domain mapping**

CERTIFICATIONS

- IBM | Node.js & MongoDB: Developing Back-end Database Applications | Certificate ID ZG22BOQAFUYX
- University of Michigan | Python Data Structures | Certificate ID IDYCTOACB10P
- University of Michigan | Programming for Everybody (Getting Started with Python) | Certificate ID 2KXO6MRZ2OPK
