

Job Description Celebal Technologies.

- Celebal Technologies – Full Stack Developer (Intern / Junior) Department: Engineering & AI
- Location: Jaipur, Rajasthan, India
- Employment Type: Full-Time / Internship
- Experience: 0–2 Years / Freshers Welcome
- Posted: April 2026

About Celebal Technologies

Celebal Technologies is a leading Data & AI solutions company and a trusted Microsoft Gold Partner, working with enterprise clients across Banking, Healthcare, Retail, Manufacturing, and Energy sectors globally. We specialize in Generative AI, LLM applications, Data Engineering, and enterprise-grade full-stack solutions.

Role Overview

Celebal Technologies is looking for a passionate Full Stack Developer to join the Engineering & AI team. You will:

- Build AI-powered enterprise web applications, REST APIs, and data-driven dashboards.
- Work on core backend optimization and intuitive frontend development.
- Collaborate with Data Scientists, ML Engineers, and Product Managers.
- Build scalable, production-grade solutions used by global enterprise clients.

Key Responsibilities

- Design, develop, and maintain full-stack web features using React, Next.js, and Node.js/Express.
- Build and optimize RESTful APIs integrated with AI/ML backends, reducing backend response times through query optimization.
- Develop and integrate AI-powered features including RAG pipelines, AI-agents, MCP servers, and LLM evaluation systems.
- Work with databases including MongoDB, SQL, and Vector DBs (Pinecone) using ORM tools like Prisma.
- Collaborate on real-time dashboards and analytics-driven interfaces, streamlining workflows and reducing manual reporting.
- Participate in code reviews, sprint planning, and agile ceremonies.
- Write clean, well-documented, and testable code following best engineering practices.

Required Qualifications

- Pursuing or completed B.Tech in Computer Science (AI) or a related field.
- CGPA of 8.8+ preferred.
- Proficiency in JavaScript, React, Next.js, and Express.js for full-stack development.
- Experience with REST API design, backend optimization, and database management (MongoDB, SQL).
- Hands-on exposure to AI/ML concepts — LLM applications, RAG, AI agents, or MCP servers.

- Familiarity with Vector Databases (Pinecone) and ORM tools like Prisma.
- Strong problem-solving skills with the ability to ship end-to-end features independently.

Good to Have

- Experience with Dart (Flutter) for cross-platform mobile development, specifically building agentic assistants.
- Exposure to real-time systems or voice/speech pipelines (STT/TTS) for hands-free experiences.
- Hackathon experience (e.g., 24-hour events) or shipped personal projects demonstrating initiative.
- Previous experience as a Teaching Assistant, demonstrating strong debugging and leadership skills.

What Celebal Technologies Offers

- Work on enterprise-grade, AI-first products used by global clients.
- Mentorship from experienced engineers and data scientists.
- Exposure to cutting-edge technologies: GenAI, LLMs, Databricks, and more.
- Collaborative and fast-paced engineering culture with real ownership.
- Certificate of completion and potential for full-time conversion based on performance.

How to Apply

Submit your application:

- Send your updated resume to careers@celebaltech.com.
- Use the subject line: Full Stack Developer Application — [Your Name].
